Community Health Needs Assessment Table of Contents

I. Executive Summary

- a) Community Health Area of Future Focus (A prioritized description of future community unmet needs identified by community discussion)
- b) Town Hall CHNA Health Findings: Areas of Strengths and Areas to Change and/or Improvement.

II. Methodology

- a) CHNA Scope and Purpose
- b) Local Collaborating CHNA Parties (The identity of all organizations in which the organization collaborated and third parties that engaged to assist with the CHNA)
- c) CHNA and Town Hall Research Process (A description of the process & methods used to conduct the CHNA, a description of how the organization considered the input of persons representing the community, an explanation of the process/criteria used in prioritizing, and an evaluation of the impact of any actions that were taken to address the significant health needs identified in the immediately preceding CHNA.)
- d) Community Profile (A description of the community served by the facility and how the community was determined)

III. Community Health Status

- a) Historical Community Health Indicators Review Secondary Data
- b) Current Community Health Status Online Feedback Research

IV. Inventory of Existing County Health Resources

- a) Community Healthcare Service Offerings
- b) Provider Manpower (Local and Visiting Specialists)
- c) CHNA Inventory of PSA Services and Providers (A description of the existing healthcare facilities and other resources within the community available to meet the needs identified through the CHNA)

V. Detail Exhibits

- a) Patient Origin & Access to Care
- b) Town Hall Attendees, Notes, and Feedback
- c) Public CHNA Notice / News
- d) Primary Research Detail
- e) County Health Rankings & Roadmap Detail

I. Executive Summary

[VVV Consultants LLC]

I. Executive Summary

Loring Hospital (Primary Service Area) – Sac County, IA - 2025 Community Health Needs Assessment (CHNA)

The previous Community Health Needs Assessment for Loring Hospital and its primary service area was completed in 2022. (Note: The Patient Protection and Affordable Care Act (ACA) requires non-profit hospitals to conduct a CHNA every three years and adopt an implementation strategy to meet the needs identified by the CHNA). The Round 5 Sac County, IA CHNA began in November of 2024 and was facilitated/created by VVV Consultants, LLC (Olathe, KS) staff under the direction of Vince Vandehaar, MBA.

Creating healthy communities requires a high level of mutual understanding and collaboration among community leaders. The development of this assessment brings together community health leaders, providers, and other residents to research and prioritize county health needs while documenting community health delivery success. This health assessment will serve as the foundation for community health improvement efforts for the next three years.

Important community CHNA Benefits for both the local hospital and the health department, are as follows: 1.) Increases knowledge of community health needs and resources 2.) Creates a common understanding of the priorities of the community's health needs 3.) Enhances relationships and mutual understanding between and among stakeholders 4.) Provides a basis upon which community stakeholders can make decisions about how they can contribute to improving the health of the community 5.) Provides rationale for current and potential funders to support efforts to improve the health of the community 6.) Creates opportunities for collaboration in delivery of services to the community and 7.) Guides the hospital and local health department on how they can align their services and community benefit programs to best meet needs, and 8.) fulfills the Hospital's "Mission" to deliver.

County Health Area of Future Focus on Unmet Needs

Area Stakeholders held a community conversation to review, discuss, and prioritize health delivery. Below are two tables reflecting community views and findings:

Key CHNA Round #5 Secondary Research Conclusions found:

IOWA HEALTH RANKINGS: According to the 2023 Robert Woods Johnson County Health Rankings, Sac Co, KS, on average was ranked 37th in Health Outcomes, 37th in Health Factors, and 35th in Physical Environmental Quality out of the 99 Counties.

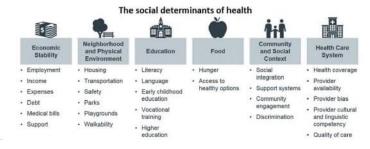

- **TAB 1.** Sac County's population is 6,686 (based on 2023 findings). About 6% of the population is under the age of 5, while the population that is over 65 years old is 24.7%. Children in single parent households make up a total of 18.7% compared to the rural norm of 19.4%, and 91.3% are living in the same house as one year ago.
- **TAB 2.** In Sac County, the average per capita income is \$38,596 while 9.5% of the population is in poverty. The severe housing problem was recorded at 8.7% compared to the rural norm of 9.5%. Those with food insecurity in Sac County is 6.3%, and those having limited access to healthy foods (store) is 3.8%. Individuals recorded as having a long commute while driving alone is 23.1% compared to the norm of 25.4%.
- **TAB 3.** Children eligible for a free or reduced-price lunch in Sac County is 43.1%. Findings found that 93.7% of Sac County ages 25 and above graduated from high school while 21.6% has a bachelor's degree or higher (2022).
- **TAB 4.** The rate of births where prenatal care began in the first trimester was recorded at 847.6 (per 1k) compared to the rural norm of 689.5. Additionally, the rate of births with low birth weight is 76.2. The rate of births where mother smoked during pregnancy is 104.8 compared to the rural norm of 126.6 (per 1k).
- **TAB 5.** The Sac County primary care service coverage ratio is 1 provider (county based officed physician who is a MD and/or DO) to 1,625 residents. There were 1,157 preventable hospital stays in compared to the rural norm of 2,320. The average time patients spent in the emergency room before seen by a healthcare professional was recorded at 122 minutes.

Secondary Research Continued

- **TAB 6.** In Sac County, adults ever diagnosed with depression as of 2021 was 18.5%. The age-adjusted suicide mortality rate per 100,000 population was recorded at 14.3. The average mentally unhealthy days recorded 4.4 days in 2021 out of 7 days a week.
- **TAB 7a 7b.** Sac County has an obesity percentage of 38.9% and a physical inactivity percentage is 24.7%. The percentage of adults who smoke is 17.5%, while the excessive drinking percentage is 19.1%. The percentage of adults reported with diabetes in 2021 is 8.4% while the recorded percentage of COPD is 6.4%. The prevalence of coronary heart disease among adults in 2021 is 5.1%. Additionally, the percentage of prevalence of cancer among adults was recorded as 6.5%.
- **TAB 8.** The adult uninsured rate for Sac County is 6.3% compared to the rural norm of only 6.6%.
- **TAB 9.** The life expectancy rate in Sac County for males and females is roughly 78 years of age (78.4). Alcohol-impaired driving deaths for Sac County is 10% while age-adjusted Cancer Mortality rate per 100,000 is 288.3. The age-adjusted heart disease mortality rate per 100,000 is at 379.
- **TAB 10.** A recorded 61.5% of Sac County has access to exercise opportunities. Continually,50% of women have done a mammography screening compared to the rural norm of 49.3%. Adults recorded in Sac County who have had a regular routine check-up is 71.6%. Lastly, the age-adjusted prevalence of high blood pressure among adults in 2021 recorded is 26.4%.

Social Determinants Views Driving Community Health: From Town Hall conversations, Economic Stability, Health Care System, Community/Social, and Support Neighborhood are impacting community health, see Sec V for a detailed analysis.

Social Determinants Online Community Feedback – Loring Hospital PSA, IA

| "KEY" Social Determinant Takeaways to Improve Our Community Health | | | | | | | | | |
|--|---|--|--|--|--|--|--|--|--|
| Loring Hospital PSA Online Open End Comments | | | | | | | | | |
| Lack of education on health & wellness topics & immediate health concerns in the community. | We do not have a heavy saturation of employment opportunities especially with fair wages that you can actually live comfortably on. | | | | | | | | |
| A transportation system that is free or affordable for seniors on fixed/limited income would be a great service. | More empathetic and concerned about the school/community needs. To be more understanding and helpful to their community members | | | | | | | | |
| Food for elderly and homeless | Bike trail, events that promote fitness doing something about the amount of drugs in sac city | | | | | | | | |

Key CHNA Round #5 Primary Research Conclusions found:

Community Feedback from residents, community leaders, and providers (N=182) provided the following community insights via an online perception survey:

- Using a Likert scale, the average between Sac County stakeholders and residents that would rate the overall quality of healthcare delivery in their community as either Very Good or Good; is 84.1%.
- Sac County stakeholders are very satisfied with some of the following services:
 Ambulance Services, Chiropractors, Dentists, Emergency Room, Hospice / Palliative,
 Inpatient Services, Outpatient Services, Pharmacy, Primary Care, Public Health, and
 Visiting Specialists
- When considering past CHNA needs, the following topics came up as the most pressing: Mental Health Services, Drug / Alcohol Abuse, Obesity / Nutrition, Cancer, Childcare, Senior Health, Transportation, Disease Prevention / Wellness, Housing, and Awareness of Healthcare Services.

During the Town Hall on April 3rd, 2025, a discussion was held to evaluate the impact of any actions taken to address the 2022 significant health needs identified. The table below was reviewed in-depth asking for feedback on which needs are still pressing and ongoing, thus evaluating actions taken in 2022.

II. Methodology

[VVV Consultants LLC]

II. Methodology

a) CHNA Scope and Purpose

The federal Patient Protection and Affordable Care Act (ACA) requires that each registered 501(c)3 hospital conduct a Community Health Needs Assessment (CHNA) at least once every three years and adopt a strategy to meet community health needs. Any hospital that has filed a 990 is required to conduct a CHNA. IRS Notice 2011-52 was released in late fall of 2011 to give notice and request comments.

JOB #1: Meet/Report IRS 990 Required Documentation

- 1. A definition of the community served by the hospital facility and a description of how the community was determined.
- 2. A description of the process and methods used to conduct the CHNA.
- 3. A description of how the hospital facility solicited and took into account input received from persons who represent the broad interests of the community it serves.
- 4. A prioritized description of the significant health needs of the community identified through the CHNA. This includes a description of the process and criteria used in identifying certain health needs as significant and prioritizing those significant health needs.
- 5. A description of resources potentially available to address the significant health needs identified through the CHNA.
- 6. An evaluation of the impact of any actions that were taken to address the significant health needs identified in the immediately preceding CHNA.

Section 501(r) provides that a CHNA must take into account input from persons who represent the broad interests of the community served by the hospital facility, including individuals with special knowledge of or expertise in public health. Under the Notice, the persons consulted must also include: Government agencies with current information relevant to the health needs of the community and representatives or members in the community who are medically underserved, low-income, minority populations, and populations with chronic disease needs. In addition, a hospital organization may seek input from other individuals and organizations located in or serving the hospital facility's defined community (e.g., health care consumer advocates, academic experts, private businesses, health insurance and managed care organizations, etc.).

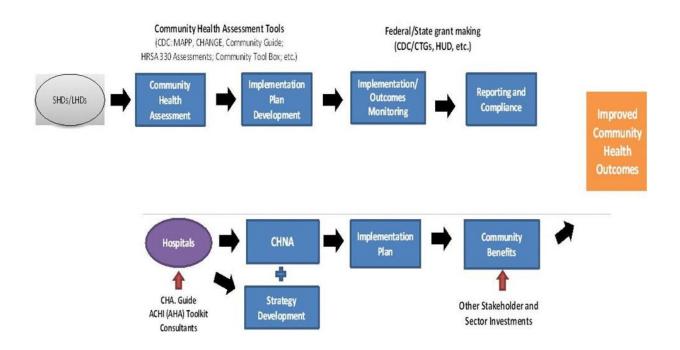

JOB #2: Making a CHNA Widely Available to the Public

The Notice provides that a CHNA will be considered to be "conducted" in the taxable year that the written report of the CHNA findings is made widely available to the public. The Notice also indicates that the IRS intends to pattern its rules for **making a CHNA** "widely available to the **public**" after the rules currently in effect for Form 990. Accordingly, an organization would make a **facility's written report** widely available by posting the final report on its website either in the form of (1) the report itself, in a readily accessible format or (2) a link to another organization's website, along with instructions for accessing the report on that website. The Notice clarifies that an organization must post the CHNA for each facility until the date on which its subsequent CHNA for that facility is posted.

JOB #3: Adopt an Implementation Strategy by Hospital

Section 501(r) requires a hospital organization to adopt an implementation strategy to meet the needs identified through each CHNA. The Notice defines an "implementation strategy" as a written plan that addresses each of the needs identified in a CHNA by either (1) describing how the facility plans to meet the health need or (2) identifying the health need as one that the facility does not intend to meet and explaining why the facility does not intend to meet it. A hospital organization may develop an implementation strategy in collaboration with other organizations, which must be identified in the implementation strategy. As with the CHNA, a hospital organization that operates multiple hospital facilities must have a separate written implementation strategy for each of its facilities.

Great emphasis has been given to work hand-in-hand with leaders from hospitals, the state health department and the local health department. A common approach has been adopted to create the CHNA, leading to aligned implementation plans and community reporting.

IRS Requirements Overview (Notice 2011-52)

Notice and Request for Comments Regarding the Community Health Needs Assessment Requirements for Tax-exempt Hospitals

Applicability of CHNA Requirements to "Hospital Organizations"

The CHNA requirements apply to "hospital organizations," which are defined in Section 501(r) to include (1) organizations that operate one or more state-licensed hospital facilities, and (2) any other organization that the Treasury Secretary determines is providing hospital care as its principal function or basis for exemption.

How and When to Conduct a CHNA

Under Section 501(r), a hospital organization is required to conduct a CHNA for each of its hospital facilities once every three taxable years. The CHNA must take into account input from persons representing the community served by the hospital facility and must be made widely available to the public. The CHNA requirements are effective for taxable years beginning after March 23. 2012. As a result, a hospital organization with a June 30 fiscal year end must complete a CHNA full report every 3 years for each of its hospital facilities by fiscal June 30th.

Determining the Community Served

A CHNA must identify and assess the health needs of the **community served** by the hospital facility. Although the Notice suggests that geographic location should be the primary basis for defining the community served, it provides that the organization may also take into account the target populations served by the facility (e.g., children, women, or the aged) and/or the facility's principal functions (e.g., specialty area or targeted disease). A hospital organization, however, will not be permitted to define the community served in a way that would effectively circumvent the CHNA requirements (e.g., by excluding medically underserved populations, low-income persons, minority groups, or those with chronic disease needs).

Persons Representing the Community Served

Section 501(r) provides that a CHNA must take into account input from **persons who represent the broad interests of the community** served by the hospital facility, including individuals <u>with special knowledge of or expertise in public health</u>. Under the Notice, the persons consulted must also include: (1) government agencies with current information relevant to the health needs of the community and (2) representatives or members of medically underserved, low-income, and minority populations, and populations with chronic disease needs, in the community. In addition, a hospital organization may seek input from other individuals and organizations located in or serving the hospital facility's defined community (e.g., health care consumer advocates, academic experts, private businesses, health insurance and managed care organizations, etc.).

Required Documentation

The Notice provides that a hospital organization will be required to separately document the CHNA for each of its hospital facilities in a **written report** that includes the following information: 1) a description of the community served by the facility and how the community was determined; 2) a description of the process and methods used to conduct the CHNA; 3) the identity of any and all organizations with which the organization collaborated and third parties that it engaged to assist with the CHNA; 4) a description of how the organization considered the input of persons representing the community (e.g., through meetings, focus groups, interviews, etc.), who those persons are, and their qualifications; 5) a prioritized

description of all of the community needs identified by the CHNA and an explanation of the process and criteria used in prioritizing such needs; and 6) a description of the existing health care facilities and other resources within the community available to meet the needs identified through the CHNA.

Making a CHNA Widely Available to the Public

The Notice provides that a CHNA will be considered to be "conducted" in the taxable year that the written report of the CHNA findings is made widely available to the public. The Notice also indicates that the IRS intends to pattern its rules for making a CHNA "widely available to the public" after the rules currently in effect for Forms 990. Accordingly, an organization would make a facility's written report widely available by posting on its website either (1) the report itself, in a readily accessible format, or (2) a link to another organization's website, along with instructions for accessing the report on that website. The Notice clarifies that an organization must post the CHNA for each facility until the date on which its subsequent CHNA for that facility is posted.

How and When to Adopt an Implementation Strategy

Section 501(r) requires a hospital organization to adopt an implementation strategy to meet the needs identified through each CHNA. The Notice defines an "implementation strategy" as a written plan that addresses each of the needs identified in a CHNA by either (1) describing how the facility plans to meet the health need, or (2) identifying the health need as one that the facility does not intend to meet and explaining why the facility does not intend to meet it. A hospital organization may develop an implementation strategy in collaboration with other organizations, which must be identified in the implementation strategy. As with the CHNA, a hospital organization that operates multiple hospital facilities must have a separate written implementation strategy for each of its facilities.

Under the Notice, an implementation strategy is considered to be "adopted" on the date the strategy is approved by the organization's board of directors or by a committee of the board or other parties legally authorized by the board to act on its behalf. Further, the formal adoption of the implementation strategy must occur by the end of the same taxable year in which the written report of the CHNA findings was made available to the public. For hospital organizations with a June 30 fiscal year end, that effectively means that the organization must complete and appropriately post its first CHNA no later than its fiscal year ending June 30, 2013, and formally adopt a related implementation strategy by the end of the same tax year. This final requirement may come as a surprise to many charitable hospitals, considering Section 501(r) contains no deadline for the adoption of the implementation strategy.

IRS Community Health Needs Assessment for Charitable Hospital Organizations - Section 501(0(3) Last Reviewed or Updated: 21-Aug-2020

In addition to the general requirements for tax exemption under Section 501(c)(3) and Revenue Ruling 69-545hospital organizations must meet the requirements imposed by Section 501(r) on a facility-by-facility basis in order to be treated as an organization described in Section 501(c)(3). These additional requirements are:

- 1. Community Health Needs Assessment (CHNA) Section 501(r)(3),
- 2. Financial Assistance Policy and Emergency Medical Care Policy Section 501(r)(4),
- 3. Limitation on Charges Section 501(r)(5), and
- 4. Billing and Collections Section 501(r)(6).

Medically underserved populations include populations experiencing health disparities or that are at risk of not receiving adequate medical care because of being uninsured or underinsured, or due to geographic, language, financial, or other barriers. Populations with language barriers include those with limited English proficiency. Medically underserved populations also include those living within a hospital facility's service area but not receiving adequate medical care from the facility because of cost, transportation difficulties, stigma, or other barriers.

Additionally, in determining its patient populations for purposes of defining its community, a hospital facility must take into account all patients without regard to whether (or how much) they or their insurers pay for the care received or whether they are eligible for assistance under the hospital facility's financial assistance policy. If a hospital facility consists of multiple buildings that operate under a single state license and serve different geographic areas or populations, the community served by the hospital facility is the aggregate of these areas or populations.

Additional Sources of Input

In addition to soliciting input from the three required sources, a hospital facility may solicit and take into account input received from a broad range of persons located in or serving its community. This includes, but is not limited to:

- Health care consumers and consumer advocates
- Nonprofit and community-based organizations
- Academic experts
- Local government officials
- Local school districts

- Health care providers and community health centers
- Health insurance and managed care organizations,
- Private businesses, and
- Labor and workforce representatives.

Although a hospital facility is not required to solicit input from additional persons, it must take into account input received from any person in the form of written comments on the most recently conducted CHNA or most recently adopted implementation strategy.

Collaboration on CHNA Reports

A hospital facility is permitted to conduct its CHNA in collaboration with other organizations and facilities. This includes related and unrelated hospital organizations and facilities, for-profit and government hospitals, governmental departments, and nonprofit organizations.

In general, every hospital facility must document its CHNA in a separate CHNA report unless it adopts a joint CHNA report. However, if a hospital facility is collaborating with other facilities and organizations in conducting its CHNA, or if another organization has conducted a CHNA for all or part of the hospital facility's community, portions of a hospital facility's CHNA report may be substantively identical to portions of the CHNA reports of a collaborating hospital facility or other organization conducting a CHNA, if appropriate under the facts and circumstances.

If two hospital facilities with overlapping, but not identical, communities collaborate in conducting a CHNA, the portions of each hospital facility's CHNA report relevant to the shared areas of their communities might be identical. So, hospital facilities with different communities, including general and specialized hospitals, may collaborate and adopt substantively identical CHNA reports to the extent appropriate. However, the CHNA reports of collaborating hospital facilities should differ to reflect any material differences in the communities served by those hospital facilities. Additionally, if a governmental public health department has conducted a CHNA for all or part of a hospital facility's community, portions of the hospital facility's CHNA report may be substantively identical to those portions of the health department's CHNA report that address the hospital facility's community.

Collaborating hospital facilities may produce a joint CHNA report as long as all of the collaborating hospital facilities define their community to be the same and the joint CHNA report contains all of the same basic information that separate CHNA reports must contain. Additionally, the joint CHNA report must be clearly identified as applying to the hospital facility.

Joint Implementation Strategies

As with the CHNA report, a hospital facility may develop an implementation strategy in collaboration with other hospital facilities or other organizations. This includes but is not limited to related and unrelated hospital organizations and facilities, for-profit and government hospitals, governmental departments, and

nonprofit organizations. In general, a hospital facility that collaborates with other facilities or organizations in developing its implementation strategy must still document its implementation strategy in a separate written plan that is tailored to the particular hospital facility, taking into account its specific resources. However, a hospital facility that adopts a joint CHNA report may also adopt a joint implementation strategy. With respect to each significant health need identified through the joint CHNA, the joint implementation strategy must either describes how one or more of the collaborating facilities or organizations plan to address the health need or identify the health need as one the collaborating facilities or organizations do not intend to address. It must also explain why they do not intend to address the health need.

A joint implementation strategy adopted for the hospital facility must also: Be clearly identified as applying to the hospital facility, Clearly identify the hospital facility's role and responsibilities in taking the actions described in the implementation strategy as well as the resources the hospital facility plans to commit to such actions, and Include a summary or other tool that helps the reader easily locate those portions of the joint implementation strategy that relate to the hospital facility.

Adoption of Implementation Strategy

An authorized body of the hospital facility must adopt the implementation strategy. This must be done on or before the 15th day of the fifth month after the end of the taxable year in which the hospital facility finishes conducting the CHNA. This is the same due date (without extensions) of the Form 990.

Acquired Facilities A hospital organization that acquires a hospital facility (through merger or acquisition) must meet the requirements of Section 501(r)(3) with respect to the acquired hospital facility by the last day of the organization's second taxable year beginning after the date on which the hospital facility was acquired. In the case of a merger that results in the liquidation of one organization and survival of another, the hospital facilities formerly operated by the liquidated organization will be considered "acquired," meaning they will have until the last day of the second taxable year beginning after the date of the merger to meet the CHNA requirements. Thus, the final regulations treat mergers equivalently to acquisitions.

New Hospital Organizations

An organization that becomes newly subject to the requirements of Section 501(r) because it is recognized as described in Section 501(c)(3) and is operating a hospital facility must meet the requirements of Section 501(r)(3) with respect to any hospital facility by the last day of the second taxable year beginning after the latter of: The effective date of the determination letter recognizing the organization as described in Section 501(c)(3). The first date that a facility operated by the organization was licensed, registered, or similarly recognized by a state as a hospital.

New Hospital Facilities

A hospital organization must meet the requirements of Section 501(r)(3), with respect to a new hospital facility it operates by the last day of the second taxable year beginning after the date the facility was licensed, registered, or similarly recognized by its state as a hospital.

Transferred/Terminated Facilities

A hospital organization is not required to meet the requirements of Section 501(r)(3) with respect to a hospital facility in a taxable year if the hospital organization transfers all ownership of the hospital facility to another organization or otherwise ceases its operation of the hospital facility before the end of the taxable year. The same rule applies if the hospital facility ceases to be licensed, registered, or similarly recognized as a hospital by a state during the taxable year. By extension, a government hospital organization that voluntarily terminates its Section 501(c)(3) recognition as described in Rev. Proc. 2018-5 (updated annually) is no longer considered a hospital organization for purposes of Section 501(r) and therefore is not required to meet the CHNA requirements during the taxable year of its termination.

Public Health Criteria:

<u>Domain 1: Conduct and disseminate assessments focused on population health status and public health issues facing the community.</u>

Domain 1 focuses on the assessment of the health of the population in the jurisdiction served by the health department. The domain includes systematic monitoring of health status; collection, analysis, and dissemination of data; use of data to inform public health policies, processes, and interventions; and participation in a process for the development of a shared, comprehensive health assessment of the community.

DOMAIN 1 includes 4 STANDARDS:

- **Standard 1.1 -** Participate in or Conduct a Collaborative Process Resulting in a Comprehensive Community Health Assessment
- **Standard 1.2** Collect and Maintain Reliable, Comparable, and Valid Data That Provide Information on Conditions of Public Health Importance and on the Health Status of the Population
- **Standard 1.3** Analyze Public Health Data to Identify Trends in Health Problems, Environmental Public Health Hazards, and Social and Economic Factors That Affect the Public's Health
- Standard 1.4 Provide and Use the Results of Health Data Analysis to Develop Recommendations Regarding Public Health Policy, Processes, Programs, or Interventions

Required CHNA Planning Process Requirements:

- a. Participation by a wide range of community partners.
- b. Data / information provided to participants in CHNA planning process.
- c. Evidence of community / stakeholder discussions to identify issues & themes. Community definition of a "healthy community" included along with list of issues.
- d. Community assets & resources identified.
- e. A description of CHNA process used to set priority health issues.

Seven Steps of Public Health Department Accreditation (PHAB):

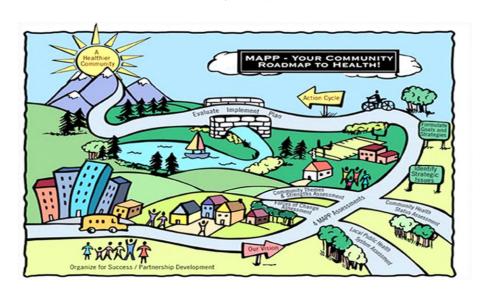

- 1. Pre-Application
- 2. Application
- 3. Document Selection and Submission
- 4. Site Visit
- 5. Accreditation Decision
- 6. Reports
- 7. Reaccreditation

MAPP Process Overview

Mobilizing for Action through Planning and Partnerships (MAPP) is a flexible strategic planning tool for improving the health and quality of life for the community. Like most strategic planning, MAPP involves organizing partners, creating a vision and shared values, collecting data, identifying areas for improvement, and developing goals and strategies to address them. Through collaboration with partners and the community, MAPP allows us to focus our efforts and work on issues to strengthen the local public health system.

The MAPP process includes the following six phases. It's important to note that MAPP has no set end point and will continue throughout the life cycle of the Community Health Improvement Plan (CHIP).

- 1. In this first phase, **Organize for Success/Partnership Development**, various sectors of the community with established relationships are reviewed, leading to the identification of areas for partnership development and creation of new relationships to enhance the MAPP process.
- 2. In the second phase, **Visioning**, a shared community vision and common values for the MAPP process are created.
- 3. In the third phase, **Four MAPP Assessments**, data is collected from existing and new sources about the health of our community, which results in a Community Health Assessment (CHA).
- 4. In the fourth phase, **Identify Strategic Issues**, community partners and health professionals select issues based on data collected from the third phase that are critical to the local public health system and align with the vision from the second phase.
- 5. In the fifth phase, **Formulate Goals and Strategies**, potential ways to address the strategic issues are identified by the community along with the setting of achievable goals. The final result is a Community Health Improvement Plan (CHIP).
- 6. The sixth and final phase of the MAPP process is the **Action Cycle**, which is where the work happens for meeting the objectives set in the previous phase. Through these collaborative efforts, the health of the community is improved.

Social Determinants of Health

What Are Social Determinants of Health?

<u>Social determinants of health (SDOH) external icon</u> are defined as the conditions in which people are born, grow, live, work, and age. SDOH are shaped by the distribution of money, power, and resources throughout local communities, nations, and the world. Differences in these conditions lead to health inequities or the unfair and avoidable differences in health status seen within and between countries.

<u>Healthy People 2030external icon</u> includes SDOH among its leading health indicators. One of Healthy People 2030's five overarching goals is specifically related to SDOH: Create social, physical, and economic environments that promote attaining the full potential for health and well-being for all.

Through broader awareness of how to better incorporate SDOH throughout the multiple aspects of public health work and the <u>10 Essential Public Health Services</u>, public health practitioners can transform and strengthen their capacity to advance health equity. Health equity means that everyone has a fair and just opportunity to be as healthy as possible. This requires removing obstacles to health, such as poverty, discrimination, and their consequences, including powerlessness and lack of access to good jobs with fair pay, quality education and housing, safe environments, and health care.

Round #5 CHNA focuses on Social Determinants & Health Equity.

Centers for Medicare & Medicaid Services Health Equity Domains

CMS' Hospital Commitment to Health Equity has introduced two equity-focused process measures in 2023: screening for Social Drivers of Health (SDOH-01) and Screen Positive Rate for Social Drivers of Health (SDOH-02).

Domain 1: Equity as a Strategic Priority

The hospital has a strategic plan for advancing health care equity that accomplishes the following:

- > Identifies priority populations who currently experience health disparities.
- > Establishes health care equity goals and discrete action steps to achieve them.
- Outlines specific resources that are dedicated to achieving equity goals.
- Describes an approach for engaging key stakeholders, such as community partners.

Domain 2: Data Collection

The hospital is engaging in the following three key data collection activities.

- Collecting demographic information, including self-reported race and ethnicity, and SDOH information, on a majority of patients
- Training staff in the culturally sensitive collection of demographics and SDOH information
- Inputting patient demographic and/ or SDOH information into structured interoperable data elements using a certified electronic health record technology.

Domain 3: Data Analysis

The hospital stratifies key performance indicators by demographic and/ or SDOH variables to identify equity gaps and includes this information on hospital performance dashboards.

Domain 4: Quality Improvement

The hospital participates in local, regional and or national quality improvement activities that are focused on reducing health disparities.

Domain 5: Leadership Engagement

The hospital's senior leadership, including the chief executives and the entire hospital board of trustees, demonstrates a commitment to equity through the following two activities.

- Annual reviews of the hospital's strategic plan for achieving health equity
- Annual reviews of key performance indicators stratified by demographic and/ or social factors.

Sources

The Joint Commission. (2022, June 20). R3 Report: New Requirements to Reduce Health Care Disparities. Retrieved from https://www.jointcommission.org/-/media/tje/documents/standards/r3-reports/r3_disparities_july2022-6-20-2022.pdf

The Joint Commission (TJC) Elements of Performance - Regulatory and Accreditation Requirements Related to Health Equity and Social Determinants of Health

New and revised TJC requirements to reduce health care disparities went into effect Jan. 1, 2023. Below are the six elements of performance.

Element of Performance 1:

The organization designates an individual to lead activities aimed at reducing healthcare disparities. (Hospital Responsibility)

Element of Performance 2:

The organization assesses the patient's health-related social needs and provides information about community resources and support services. (CHNA full report- Section I and III)

Examples of health-related social needs may include the following:

- Access to transportation
- > Difficulty paying for prescriptions or medical bills.
- Education and literacy
- > Food insecurity
- Housing insecurity

Element of Performance 3:

The organization identifies healthcare disparities in its patient population by stratifying quality and safety data. (CHNA Town Hall) Examples of sociodemographic characteristics may include but are not limited to the following: Age, Gender, Preferred Language, Race, and ethnicity.

Element of Performance 4:

The organization develops a written action plan that describes how it will address at least one of the healthcare disparities identified. (CHNA IMPL Development Plan)

Element of Performance 5:

The organization acts when it does not achieve or sustain goal(s) in its action plan to reduce health care disparities.

Element of Performance 6:

At least annually, the organization informs key stakeholders, identifying leaders, licensed practitioners, and staff, about its progress in reducing identified healthcare disparities. (Hospital Responsibility)

II. Methodology

b) Collaborating CHNA Parties

Working together to improve community health takes collaboration. Listed below is an in-depth profile of the local hospital and Health Department CHNA partners:

Loring Hospital Profile

211 Highland Avenue Sac City, Iowa 50583

CEO: Matt Johnson

About: Loring Hospital, located at 211 Highland Avenue in Sac City, Iowa, has long had a reputation for providing quality care with caring staff. The hospital is located one block off old 2-lane U.S. Highway 20, or 2 miles off new 4-lane Highway 20. Easy access, convenient parking and an easy to find entrance make Loring Hospital accessible for patients and visitors.

Loring Hospital is a 25-bed, full-service primary care critical access hospital providing service to the communities in Sac County and beyond - Sac City, Lake View, Wall Lake, Odebolt, Lytton, Early, Schaller and Fonda. Loring is a non-profit company. The hospital's medical staff consists of a variety of physicians and allied health professionals, along with a staff of more than 100 caring and professional individuals. From 24/7 emergency services to physical therapy; an independent living facility to minor and major surgeries, Loring Hospital is dedicated to providing top-notch service and exceptional patient care

Mission Statement: Loring Hospital is committed to providing exceptional healthcare in an environment of trust and compassion.

Loring Hospital offers the following services to its community:

- 3D Mammography
- Cardiac Rehab
- Cardiology
- Community Health Education
- Dermatology
- Diabetes Education
- Emergency Services
- Food Services
- General Surgery
- Inpatient Services Acute & Skilled Care
- Laboratory
- LifeLine
- Nursing Services

- Nutrition Services
- Orthopedics
- Outpatient Center
- Pain Clinic
- Pharmacy
- Podiatry
- Pulmonary Rehabilitation
- Radiology Services
- Rehabilitation Department
- Respiratory Therapy
- Sleep Studies
- Surgical Services
- Urology
- Wound Care

Sac County Health Department Profile

116 S State St. Suite A Sac City, IA 50583-2350

Administrator: Shelley Vauble

Phone: (712) 662-4785

About: Sac County Health Services is committed to Promote, Preserve, and Protect the health of our communities. Sac County Health Services has been providing public health services to residents of Sac County since 1975. With a team of dedicated professionals, we continually seek innovative ways to improve healthcare access and quality. Our holistic approach to community well-being encompasses preventative measures, education, and responsive care, making them a pillar of strength for the residents we serve.

Mission: To promote and preserve the health of all Sac County residents.

Values: Help our community engage and achieve long-term health by: Educating, **A**ssisting, **L**eading, **T**eaching, **H**ealing.

Service Offerings:

- Blood Pressure Screening
- Communicable Disease Follow up
- Health Education Program
- Healthy Feet program
- Immunizations
- TB Testing
- Emergency Preparedness
- Environmental Health & Zoning
- Family STEPS
- Home Health

b) Collaborating CHNA Parties Continued

Consultant Qualifications:

VVV Consultants LLC 601 N. Mahaffie, Olathe, KS 66061 (913) 302-7264

VVV Consultants LLC is an Olathe, KS based "boutique" healthcare consulting firm specializing in Strategy, Research and Business Development services. To date we have completed 83 unique community CHNA's in KS, MO, IA, NE and WI (references found on our website VandehaarMarketing.com

Introduction: Who We Are Background and Experience

Vince Vandehaar, MBA - Principal

VVV Consultants LLC (Olathe, KS) - start 1/1/09 *

- Adjunct Full Professor @ Avila & Webster Universities
- 35+ year veteran marketer, strategist and researcher
- Saint Luke's Health System, BCBS of KC,
- Tillinghast Towers Perrin, and Lutheran Mutual Life
- Hometown: Bondurant IA

Olivia G Hewitt BA - Associate Consultant

VVV Consultants LLC - May 2024

- Emporia University BS Marketing
- Hometown: Olathe, KS

Cassandra Kahl, BHS - Director, Project Management

VVV Consultants LLC- Nov 2020

- University of Kansas Health Sciences
- Park University MHA
- Hometown: Maple, WI

VVV Consultants LLC (EIN 27-0253774) began as "VVV Research & Development INC" in early 2009 and converted to an LLC on 12/24/12. Web: VandehaarMarketing.com

Our Mission: to research, facilitate, train, create processes to improve market performance, champion a turnaround, and uncover strategic "critical success" initiatives.

Our Vision: to meet today's challenges with the voice of the market solutions.

Our Values:

Engaged – we are actively involved in community relations & boards.

Reliable – we do what we say we are going to do.

Skilled – we understand business because we've been there.

Innovative – we are process-driven & think "out of the box."

Accountable – we provide clients with a return on their investment.

II. Methodology

c) CHNA and Town Hall Research Process

Round #5 Community Health Needs Assessment (CHNA) process began in November of 2024 for Loring Hospital in Sac County, IA to meet Federal IRS CHNA requirements.

In October 2024, a meeting was called amongst the Loring Hospital leaders to review CHNA collaborative options. <Note: VVV Consultants LLC from Olathe, KS was asked to facilitate this discussion with the following agenda: VVV CHNA experience, review CHNA requirements (regulations) and discuss CHNA steps/options to meet IRS requirements and to discuss next steps.> Outcomes from discussion led to the Loring Hospital to request VVV Consultants LLC to complete a CHNA IRS aligned comprehensive report.

VVV CHNA Deliverables:

- Document Hospital Primary Service Area meets the 80% Patient Origin Rule.
- Uncover / document basic secondary research county health data, organized by 10 tabs.
- Conduct / report CHNA Community Check-in Feedback Findings (primary research).
- Conduct a Town Hall meeting to discuss with community secondary & primary data findings leading to determining (prioritizing) county health needs.
- Prepare & publish CHNA report which meets ACA requirements.

To ensure proper PSA Town Hall representation (that meets the 80% Patient Origin Rule), a patient origin three-year summary was generated documenting patient draw by zips as seen below:

| Lori | ng Hospit | al -Defined Pri | Overall Util (IP/ER/OP) FFY24-22 | | | | |
|------|------------|-----------------|----------------------------------|-----------------------|-------|-------|--|
| Sou | ırce = IHA | Dimensions | 3 Yea | 3 Year Total = 53,051 | | | |
| # | ZIP | City | County | Total 3YR | % | ACCUM | |
| 1 | 50583 | Sac City | Sac | 24,253 | 45.7% | 45.7% | |
| 2 | 51450 | Lake View | Sac | 7,123 | 13.4% | 59.1% | |
| 3 | 50568 | Newell | Buena Vista | 2,437 | 4.6% | 63.7% | |
| 4 | 50540 | Fonda | Pocahontas | 2,420 | 4.6% | 68.3% | |
| 5 | 50561 | Lytton | Calhoun | 2,419 | 4.6% | 72.9% | |
| 6 | 50535 | Early | Sac | 2,324 | 4.4% | 77.2% | |
| 7 | 51466 | Wall Lake | Sac | 2,303 | 4.3% | 81.6% | |
| 8 | 51458 | Odebolt | Sac | 1,489 | 2.8% | 84.4% | |
| 9 | 51053 | Schaller | Sac | 1,213 | 2.3% | 86.7% | |
| 10 | 50567 | Nemaha | Sac | 741 | 1.4% | 88.1% | |
| 11 | 51433 | Auburn | Sac | 457 | 0.9% | 88.9% | |

To meet IRS aligned CHNA requirements and meet Public Health accreditation criteria stated earlier, a four-phase methodology was followed:

Phase I—Discovery:

Conduct a 30-minute conference call with the CHNA county health department and hospital clients. Review / confirm the CHNA calendar of events, explain / coach clients to complete the required participant database, and schedule / organize all Phase II activities.

Phase II—Qualify Community Need:

A) Conduct secondary research to uncover the following historical community health status for the primary service area. Use Kansas Hospital Association (KHA), Vital Statistics, Robert Wood Johnson County Health Rankings, etc. to document current state of county health organized as follows:

| Health Indicators - Secondary Research |
|---|
| TAB 1. Demographic Profile |
| TAB 2. Economic Profile |
| TAB 3. Educational Profile |
| TAB 4. Maternal and Infant Health Profile |
| TAB 5. Hospital / Provider Profile |
| TAB 6. Behavioral / Mental Health Profile |
| TAB 7. High-Risk Indicators & Factors |
| TAB 8. Uninsured Profile |
| TAB 9. Mortality Profile |
| TAB 10. Preventative Quality Measures |

Phase III—Quantify Community Need:

Conduct a 90-minute Town Hall meeting with required community primary service area residents. At each Town Hall meeting, CHNA secondary data will be reviewed, an evaluation of past CHNA needs actions taken, a facilitated group discussion will occur, and a group ranking activity to determine the most important community unmet health needs was administered.

Phase IV—Complete Data Analysis and Create Comprehensive Community Health Needs Assessment:

Complete full documentation to create each CHNA section documented in the Table of Contents. Publish hard copy reports (2) for client usage plus create a full CHNA report pdf to be posted on the hospital website to meet government CHNA regulation criteria.

Specific project CHNA roles, responsibilities, and timelines are documented in the following calendar.

Loring Hospital - Sac County, IA

A Conversation with the Community & **Stakeholders**

Community Stakeholder - An Inclusive Conversation

Consumers: Uninsured/underinsured people, Members of at-risk populations, Parents, caregivers and other consumers of health care in the community, and Consumer advocates.

 $\textbf{Community leaders and groups:} \ \textbf{The hospital organization's board members, Local clergy and congregational leaders, and congregational$ Presidents or chairs of civic or service clubs -- Chamber of Commerce, veterans' organizations, Lions, Rotary, etc., Representatives from businesses – owners/CEO's of large businesses (local or large corporations with local branches.), Business people & merchants (e.g., who sell tobacco, alcohol, or other drugs), Representatives from organized labor, Political, appointed and elected officials., Foundations., United Way organizations. And other "community leaders

Public and other organizations: Public health officials, Directors or staff of health and human service organizations. City/Community planners and development officials, Individuals with business and economic development experience, Welfare and social service agency staff, Housing advocates - administrators of housing programs: homeless shelters, low-income-family housing and senior housing, Education officials and staff - school superintendents, principals and teachers, Public safety officials, Staff from state and area agencies on aging, Law enforcement agencies - Chiefs of police, Local colleges and universities, Coalitions

Other providers: Physicians, Leaders in other not-for-profit health care organizations, such as hospitals, clinics, nursing homes and home-based and community-based services. Leaders from Catholic Charities and other faith-based service providers. Mental health providers, Oral health providers, Health insurers, Parish and congregational nursing programs, Other health

II. Review of a CHNA

- What is a Community Health Needs Assessment (CHNA)..?
 - Systematic collection, assembly, analysis, and dissemination of information about the health of the community.
- A CHNA's role is to....
 - <u>Identify</u> factors that affect the health of a population and <u>determine</u> the availability of resources to adequately address those factors.
- Purpose of a CHNA Why Conduct One?
 - Determine health-related trends and issues of the community
 - Understand / evaluate health delivery programs in place.
 - Meet Federal requirements both local hospital and health department
 - Develop Implementation Plan strategies to address unmet health needs (4-6 weeks after Town Hall)

CHNA Written Report Documentation to meet IRS 990 CHNA Requirements: Table of Contents

- · A description of the community served
- · A description of the CHNA process

12

- The identity of any and all organizations and third parties which collaborated to assist with the CHNA
- A description of how the organization considered the input of persons representing the community (e.g., through meetings, focus groups, interviews, etc.), who those persons are, and their qualifications
- A prioritized description of all of the community needs identified by the CHNA.
- A description of the existing healthcare facilities and other resources within the community available to meet the needs identified through the CHNA

Social Determinants of Health

Economic Stability

Access and Quali Health C

Neighborho and Buil

and Built Commu environment Conte

Social determinants of health are the conditions in the places where people live, learn, work, play, and worship that affect a wide range of health risks and outcomes.

Health equity is when everyone has the opportunity to attain their full health potential, and no one is disadvantaged from achieving this potential because of their social position or other socially determined circumstances.

TASK A: Your Initial Thoughts on SDoH? (Small White Card)

IV. Review Current County Health Status: Secondary Data by 10 Tab Categories with a focus on Social Determinants with a Local Norm & State Rankings

Trends: Good Same Poor

Health Indicators - Secondary Research

TAB 1. Demographic Profile

TAB 2. Economic Profile

TAB 3. Educational Profile

TAB 4. Maternal and Infant Health Profile

TAB 5. Hospital / Provider Profile

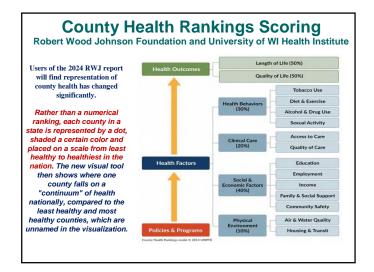

TAB 6. Behavioral / Mental Health Profile

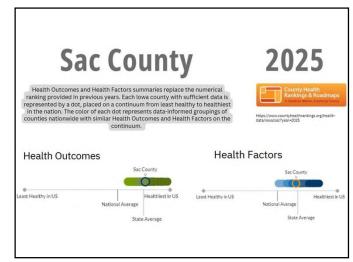

TAB 7. High-Risk Indicators & Factors

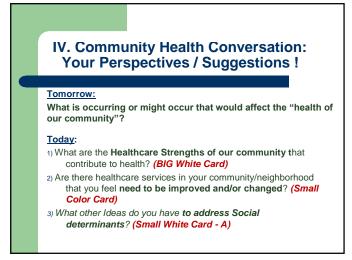

TAB 8. Uninsured Profile

TAB 9. Mortality Profile

TAB 10. Preventative Quality Measures

Data & Benchmarks Review

Community health assessments typically use both primary and secondary data to characterize the health of the community:

- **Primary data** are collected first-hand through surveys, listening sessions, interviews, and observations.
- Secondary data are collected by another entity or for another purpose.
- Indicators are secondary data that have been analyzed and can be used to compare rates or trends of priority community health outcomes and determinants.

Data and indicator analyses provide descriptive information on demographic and socioeconomic characteristics; they can be used to monitor progress and determine whether actions have the desired effect. They also characterize important parts of health status and health determinants, such as behavior, social and physical environments, and healthcare use.

Community health assessment indicators should be.

- Methodologically sound (valid, reliable, and collected over time)
- Feasible (available or collectable)
- Meaningful (relevant, actionable, and ideally, linked to evidence-based interventions)
- Important (linked to significant disease burden or disparity in the target community)

Jurisdictions should consider using data and indicators for the smallest geographic locations possible (e.g., county-, census block-, or zip code-level data), to enhance the identification of local assets and gaps.

Local reporting (County specific) sources of community-health level indicators:

| CHNA Detail Sources |
|---|
| Quick Facts - Business |
| Centers for Medicare and Medicaid Services |
| CMS Hospital Compare |
| County Health Rankings |
| Quick Facts - Geography |
| Health Matters |
| Iowa Hospital Association (IHA) |
| Quick Facts - People |
| U.S. Department of Agriculture - Food Environment Atlas |
| U.S. Center for Disease Control and Prevention |

Sources of community-health level indicators:

County Health Rankings and Roadmaps

The annual Rankings measure vital health factors, including high school graduation rates, obesity, smoking, unemployment, access to healthy foods, the quality of air and water, income inequality, and teen births in nearly every county in America. They provide a snapshot of how health is influenced by where we live, learn, work and play.

Prevention Status Reports (PSRs)

The PSRs highlight—for all 50 states and the District of Columbia—the status of public health policies and practices designed to prevent or reduce important public health problems.

Behavioral Risk Factor Surveillance System

The world's largest, ongoing telephone health survey system, tracking health conditions and risk behaviors in the United States yearly since 1984. Data is collected monthly in all 50 states, the District of Columbia, Puerto Rico, the US Virgin Islands, and Guam.

- The <u>Selected Metropolitan/ Micropolitan Area Risk Trends</u> project was an outgrowth of BRFSS from the increasing number of respondents who made it possible to produce prevalence estimates for smaller statistical areas.
- <u>CDC Wonder</u> Databases using a rich ad-hoc query system for the analysis of public health data. Reports and other query systems are also available.

Healthy People 2030 Leading Health Indicators external icon

Twenty-six leading health indicators are organized under 12 topics.

Kids Count external icon

Profiles the status of children on a national and state-by-state basis and ranks states on 10 measures of well-being; includes a mobile site external icon.

National Center for Health Statistics

Statistical information to guide actions and policies.

Pregnancy Risk Assessment and Monitoring System

State-specific, population-based data on maternal attitudes and experiences before, during, and shortly after pregnancy.

Web-based Injury Statistics Query and Reporting System (WISQARS)

Interactive database system with customized reports of injury-related data.

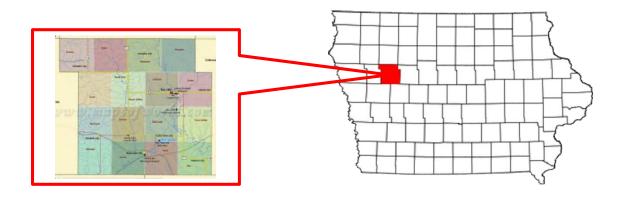

Youth Risk Behavior Surveillance System

Monitors six types of health-risk behaviors that contribute to the leading causes of death and disability among youth and adults.

II. Methodology

d) Community Profile (A Description of Community Served)

Sac County (IA) Community Profile

The population of Sac County, founded in 1851, was estimated to be 9,686 citizens in 2023 with a total area of 578 square miles and a population density of 17 persons per square mile. Some major cities in Sac County include Sac City (county seat), Lake View, Odebolt, Wall Lake, Schaller, and Early.

Major highways include US Highway 20 - runs east-west, US Highway 71, Iowa Highway 39 - from its intersection with Iowa 175 at Odebolt, runs south into Crawford County, Iowa Highway 110 - from its intersection with US 20, runs north into Buena Vista County, and Iowa Highway 175 - enters west side of county at Odebolt, runs east to intersection with US 71, east of Lake View.

Adjacent counties

- Buena Vista County north
- Calhoun County east
- <u>Carroll County</u> south and southeast
- Cherokee County northwest
- Crawford County south and southwest
- Ida County west
- Pocahontas County northeast

III. Community Health Status

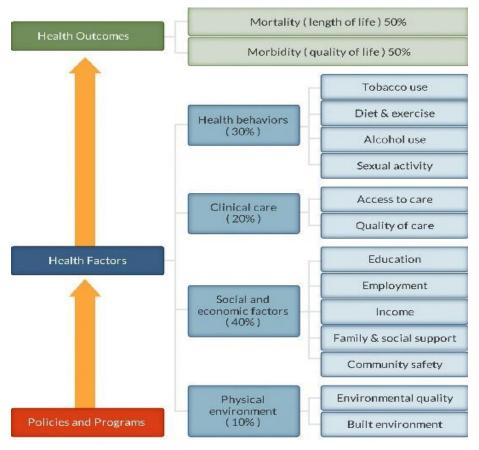

III. Community Health Status

a) Historical Health Statistics- Secondary Research_

Health Status Profile

This section of the CHNA reviews published quantitative community health indicators from public health sources and results of community primary research. To produce this profile, VVV Consultants LLC staff analyzed & trended data from multiple sources. This analysis focuses on a set of published health indicators organized by ten areas of focus (10 TABS), results from the 2020 RWJ County Health Rankings and conversations from Town Hall participates. <u>Each table published reflects a Trend column, with GREEN denoting growing/high performance indicators, YELLOW denoting minimal change/average performance indicators and RED denoting declining/low performance indicators.</u>

Note: The Robert Wood Johnson Foundation collaborates with the University of Wisconsin Population Health Institute to release annual *County Health Rankings*. As seen below, RWJ's model uses a number of health factors to rank each county.

County Health Rankings model ©2012 UWPHI

Loring Hospital Town Hall Event Notes

Date: 4/3/2025 – 11:00-12:30 p.m. @ The Loring Hospital Meeting Place Attendance: N=20

INTRO: Following is a recap of the community conversation during CHNA 2025 Town Hall

- Other than receiving care at Loring Hospital, the community is receiving care in Des Moines, Omaha, Sioux City, Fort Dodge, Waterloo, and Iowa City.
- There are 3 nursing homes in town, but availability is limited.
- Veterans go to Carrol Co VA or Des Moines.
- Moms deliver in Storm Lake and Carroll. Prenatal care is going well.
- Childcare is needed in Sac City (safe, affordable, accessible)
- The ED number is incorrect. Patients are seen within minutes upon entering the Emergency Department.
- The DOH has various programs available to the community.
- Depression is a concern for the community and higher than reported.
- As far as drugs in the community, Meth, Alcohol, Marijuana, Fentanyl, and Vaping are a concern. The community discussed combining both drugs and alcohol in substance abuse.
- STDs are a concern.
- There are exercise opportunities available, but the community is not using them.
- There are no Optometrists in the area.
- There is a lack of mental health providers in the community
- Heart disease is a problem and ongoing.

What is coming/occurring that will affect the health of the community:

- Covid
- Measles

- New Administration impacting funding
- New strands of flu

Things going well for healthcare in the community:

- Ambulance
- Emergency care
- Emergency preparedness
- Health partner collaboration (School, DOH, Hospital)
- Hospital expansion project
- Local hospital and clinics

- Outpatient clinic (Visiting Spec Orthopedics, Dermatology, Cardiology, Podiatry)
- Positive community perception of healthcare
- PT services
- Quality and long-standing providers
- School System

Areas to improve or change in the community:

- Awareness of Healthcare Services
- Childcare (Affordable & Accessible)
- Chronic Disease (Cancer & Heart)
- Communication
- Digital Impact (Phones, Social Media)
- Domestic Violence
- Drinking
- Eye Provider
- Food Insecurity
- Health Education

- Health Insurance (Coverage & Education
- Mental Health (Geriatric Psych, Diagnosis, Providers, Placement, Aftercare)
- Obesity (Nutrition & Exercise)
- Parenting
- Physician Recruitment (Aging providers)
- Preventative Health
- Substance Abuse (Drugs)
- Suicide

- Transportation
- Veterans' Health
- Women's Health Services

EMAIL Request to CHNA Stakeholders

From: Matt Johnson Date: 1/6/2025

To: Community Leaders, Providers, Hospital Board and Staff

Subject: CHNA Round #5 Community Online Feedback Survey – Loring Hospital

Loring Hospital will be working to update the 2022 Loring Hospital Community Health Needs Assessment (CHNA). We are seeking input from community members regarding the healthcare needs in order to complete the 2025 CHNA.

The goal of this assessment update is to understand progress in addressing community health needs cited in 2016, 2019, and 2022 CHNA reports while collecting up-to-date community health perceptions and ideas.

Your feedback and suggestions regarding current community health delivery are especially important to collect in order to complete this comprehensive report. To accomplish this work, a short online survey has been developed for community members to take. Please visit our hospital webpage, facebook page, or utilize the link below to complete this survey.

LINK: https://www.surveymonkey.com/r/LoringHospCHNA25

All community residents and business leaders are encouraged to **complete the 2025 online CHNA survey by February 3rd, 2025.** All responses are confidential.

Please Hold the Date A community Town Hall is scheduled for Thursday, April 3rd, 2025, for lunch 11am – 12:30pm at the Loring Hospital Meeting Place. This meeting is to discuss the survey findings and identify unmet needs.

If you have any questions about CHNA activities, please call (712) 662-7105

Thank you for your time and participation.

PR#1 News Release

Local Contact: Teresa Wirtjers, PR & Foundation Director

Media Release: 1/6/2025

2025 Community Health Needs Assessment to be Hosted by Loring Hospital

Over the next few months, **Loring Hospital w**ill be working together with other area community leaders to update the Loring Hospital 2022 Community Health Needs Assessment (CHNA). Today we are requesting community members' input regarding current healthcare delivery and unmet resident needs.

The goal of this assessment update is to understand progress from past community health needs assessments conducted in 2022, 2019 and 2016, while collecting up-to-date community health perceptions and ideas. VVV Consultants LLC, an independent research firm from Olathe, KS has been retained to conduct this countywide research.

A brief community survey has been developed to accomplish this work. <Note: The CHNA survey link can be accessed by visiting the Loring Hospital website and/or Facebook page. You may also utilize the QR code below for quick access.

All community residents and business leaders are encouraged to complete this online survey by **February 3rd, 2025.** In addition, a CHNA Town Hall meeting to discuss the survey findings and identify unmet needs will be held on **Thursday, April 3rd, 2025, for lunch from 11am-12:30pm**. More info to come soon! Thank you in advance for your time and support!

If you have any questions regarding CHNA activities, please call (712) 662-7105

EMAIL #2 Request Message

From: Theresa Wirtjers, PR & Foundation Director

Date: 2/3/25

To: Area Community Leaders, Providers and Hospital Board & Staff

Subject: Loring Hospital Community Health Needs Assessment Town Hall

lunch– April 3rd, 2025

Loring Hospital will host a Town Hall Community Health Needs Assessment (CHNA) luncheon on Thursday, April 3rd, 2025. The purpose of this meeting will be to review collected community health indicators and gather community feedback opinions on key unmet health needs for Sac Co, IA. **Note: This event will be held on Thursday, April 3rd from 11:00 a.m.** -

12:30 p.m. at the Loring Hospital Meeting Place with check-in starting at 10:30am.

We hope you find the time to attend this important event. All business leaders and residents are encouraged to join us. To adequately prepare for this event, it is imperative all RSVP who plan to attend town hall.

LINK: https://www.surveymonkey.com/r/LoringHospital TownHallRSVP

Thanks in advance for your time and support!

If you have any questions regarding CHNA activities, please call (712) 662-7105.

Join Loring Hospital's CHNA Town Hall Thursday, April 3rd, 2025.

Media Release: 2/3/25

To gauge the overall community health needs of residents, **Loring Hospital** invites the public to participate in a Community Health Needs Assessment Town Hall roundtable on **Thursday, April 3rd for lunch from 11:00 a.m. to 12:30 p.m.** located at the **Loring Hospital Meeting Place.**

This event is being held to identify and prioritize the community health needs. Findings from this community discussion will also serve to fulfill both federal and state mandates.

To adequately prepare for this event, is vital everyone planning to attend this event RSVPs. Please visit our hospital website and social media sites to obtain the link to complete your RSVP OR please utilize the QR code below.

We hope that you will be able to join us for this discussion on <u>April 3rd.</u> Thanks in advance for your time and support!

If you have any questions about CHNA activities, please call (712) 662-7105.

| | CF | INA 202 | 25 Cor | nmu | nity F | eedback: Loring Hospital PSA (IA) (N=182) |
|------|-------|-----------|--------|------|--------|--|
| ID | Zip | Rating | с1 | c2 | с3 | Q10. Being this a strong topic of interest, do you have any thoughts, ideas, and/or specific suggestions (food, housing, transportation, support, etc.) to address these 5 social determinants to improve our community health? (Please Be Specific) |
| 1117 | | Very Good | ADMIN | | | Positive and progressive leadership to set the "bar" higher. |
| | 50583 | Very Good | AWARE | TDAN | 0011 | I'm actually unaware of these things as they do not affect me. |
| 1057 | 50583 | Very Good | CARD | TRAN | SCH | Need heart doctor. Transportation to medical appointments |
| 1043 | 50583 | Good | DIAB | TRAN | ECON | hiring more help to complete diabetes trainings one on one regularly. Bringing back and keeping transportation by the nursing home. (This was very helpful) Utilizing more agencies and non-profits for food drives. Most people want to help but don't know what is needed. Posting a wanted/needed poster at the local grocery stores/dollar general for donations that could benefit local community members. Starting a local job openings website page to support economic growth. Printing local company highlights monthly. Explaining what each one does and what they have to offer our community. Taking a closer look into our Emergency Department and improvements that could be made when using on-call staff from outside our area. |
| 1014 | 51450 | Good | DOCS | SH | NUTR | Health providers need to work with the schools to create a curriculum that addresses the problems of poor nutrition, poor exercise and alcohol abuse. |
| 1047 | 50583 | Very Good | DOH | EDU | | Organize more community-based activities that are aimed to educate others about the importance of health. |
| 1163 | 51450 | Good | DOH | NUTR | HOUS | It starts with an overall plan from county/city to address these issues. Planning would involve key institutions including- hospital, school district, and community organizations, and business leaders related to health benefits. Without data it is difficult to be specific. But for the sake of argument, consider: Improve access to quality foods at reasonable prices -tough ask but necessary. Establish housing development plans that encourage cross generational interactions. Engage senior citizens to provide needed transportation to those in community by organizing a central contact point where those needed a ride can go (possibly county wide). Increase exposure between school and community regarding health care, career possibilities and other. |
| 1062 | 50583 | Good | DOH | REC | NUTR | Hospital professionals offer classes to improve community health or partner with the community rec center. Offer balance classes, strength training, nutrition classes - make food for older adults, heart healthy exercises, alternative medicine - aromatherapy |
| 1048 | 50583 | Poor | DRUG | | | LE being more aggressive on drug busting in the community and surrounding areas. |
| 1175 | 50583 | Good | ECON | NUTR | FINA | There needs to be a stronger focus within the community as a whole on economic development. New job opportunities. Along with that, there needs to be reasonable housing opportunities for those individuals as well. There are multitudes of grant opportunites at the state and federal level, but we live in a black hole in the Western part of the state for receiving those grants. The only standing assumption is that they aren't being applied for. Some form of transportation would be great in the area, but not likely to happen due to current economic conditions. There are grocery stores which are vitally important to thriving and continuance of a community. Has effort been made to work with those stores to help educate the community on nutrition? There's a fair number of walking trails and idle time locations(park and pocket parks), but what opportunities exist in the broader community to draw more people in? Tech and computer access may be hindered in the current hours of the library. It may be beneficial to create a space with this tech and internet access and offer educational courses through area colleges at a reduced price or no cost. The local employers and hospital could work with colleges to bring in students for hands on training to determine their interest in work and find a scope of study that is right for them. |
| 1080 | 51450 | Good | EDU | NUTR | YOUTH | Attach health and wellness classes to the government handouts. People need to get educated about proper nutrition and the health of children. Maybe partner with the school some how to educate parents. |
| 1112 | 50583 | Very Good | EDU | PREV | FIT | I believe Sac County does reasonably well in these areas. More education on the importance of good diet and exercise is needed. Sometimes it take people hearing a message more than once for it to sink in. |
| 1120 | 50583 | Good | EDU | PREV | OP | Lack of education - or corrections of misinformation - on health & wellness topics & immediate health concerns in the community. All the outpatient doctors & MRI, ultrasound etc equipment options are good but hopefully will improve/increase with new clinic/hospital addition. |
| 1027 | 50583 | Very Good | FAC | QUAL | | Everything is great in our hospital! |
| | 50583 | Good | FINA | NUTR | TRAN | the cost of food, houseing, transportation, are expensive, if available at all. cost of living is high. |
| 1026 | 50583 | Very Good | HOUS | HRS | NUTR | Our communities are growing and housing is minimal to rent or buy, let people build the type of home they want to live in, such as shouse, tiny homes or barndaminiums. Extend hours for clinics for all services, groceries that aren't expired or moldy |
| 1071 | 50583 | Average | HOUS | МН | NUTR | maybe fix up some of the older homes rent them,have more drives for the hungry,have mental helpers to homes so people don't have to find rides |
| 1118 | 50583 | Good | INSU | PREV | FINA | Insurance coverage needs to expand to truly cover more preventative wellness services. Cost can drive people away from participating in available programs currently available. Does anybody in our local community currently advocate for this? |
| | | | | | | |

| ID | Zip | Rating | c1 | c2 | c3 | Q10. Being this a strong topic of interest, do you have any thoughts, ideas, and/or specific suggestions (food, housing, transportation, support, etc.) to address these 5 social determinants to improve our community health? (Please Be Specific) |
| 1042 | 50583 | Good | МН | ACC | DRUG | improved and available access to mental health and substance abuse for prevention and assistance. |
| 1148 | 50583 | Good | МН | EDU | AMB | Fix the mental health issues to start, education for life line use. Don't have ambulance listed as first ph call out. Family should ck on person before ems is paiged out. Some for a transport service to aid in getting people to Apts. More pt education programs |
| 1022 | 50583 | Average | MH | EMER | | Mental health services, er services without bias |
| 1138 | 51433 | Good | MRKT | | | Use social media to advertise services |
| 1011 | 50583 | Very Good | NH | TRAN | HOUS | Many elderly have no transportation to appointments. Also affordable housing is hard to find. We keep building new houses but most families can not afford these. Rent is extremely high. |
| 1059 | 50583 | Good | НИ | | | Transportation for elderly. |
| 1082 | 51450 | Very Good | NO | | | I don't have any ideas |
| 1128 | 50583 | Good | NUTR | EDU | SH | nutrition and wellness education starting at a young agepreschool, elementary school especially. |
| 1004 | 50583 | Very Good | NUTR | HOUS | | Food, housing, social differences |
| 1173 | 50583 | Very Good | NUTR | NH | INSU | Food for elderly and homeless and health coverages. |
| 1008 | 50583 | Good | POV | FINA | | Help the lower income people that don't get help cauce government says they make to much |
| 1038 | | Good | REC | DRUG | | bike trail, events that promote fitness doing something about the amount of drugs in sac city |
| 1065 | 50583 | Average | RESO | FINA | MH | A community garden/green house would help offer healthy options at a much lower cost to community members who are struggling financially. Looking for ways to get more behavioral/mental health professionals to our area. |
| 1012 | 50568 | Very Good | SERV | FINA | | There needs to be services that are free to the public. Many do not seek help to improve their lives because they do not have the extra money to do so. |
| 1084 | 50583 | Good | SH | МН | | Our school is going upwards which is amazing and will be very helpful. We need more mental health help. We need more mental health esp in our high school. Our police need to be more or a presence and stronger on laws. |
| 1102 | 50575 | Very Good | SH | SPRT | | i wish people were more empathetic and concerned about the school/community needs. To be more understanding and helpful to their community members and not to be judgemental of the needs. |
| 1036 | 50583 | Good | SPRT | DOH | REC | Establish support for entity (Sac County Public Health or Sac County Healthcare Coalition) funding to provide community education and programs, continue to improve wellness opportunities (trails, outdoors, events and safety of those areas), Wellness program for our employees here at Loring to focus on preventative care and giving a resource and initiative for wellness practices. |
| 1164 | 50583 | Good | TRAN | NH | | A transportation system that is free or affordable for seniors on fixed/limited income would be a great service. Many members of our community receive care in Dakota Dunes which is an hour and half drive. Many elderly rely on family or friends for this transportation. Thus, having to miss work, etc. |
| 1069 | 50535 | Average | TRAN | NUTR | ACC | More transportation for students that don't have access to transportation. Better access to food such as food pantries. |
| 1091 | | Very Good | | SCH | | There needs to be transportation for people who don't have family/friends available to transport them to appointments either while they are recovering from a health incident or when they no longer drive |
| 1075 | | Very Good | TRAN | | | Maybe a taxi service in our small towns |
| 1010 | 50583 | Average | TRAN | | | Sac City needs a transportation service, whether it be a bus or taxi service. |
| 1081 | 50583 | Good | WAG | HOUS | FINA | We do not have a heavy saturation of employment opportunities especially with fair wages that you can actually live comfortably on. Housing is unaffordable and hard to find. |
| 1061 | 51450 | Average | WAG | RESO | | Need good paying jobs. Not only newly created jobs, but increase in wages for many who have been a dedicated employee for many years at their positions. If you can't make a decent wage, other things in life become hard, being able to maintain you vehicle, home, resourcing food. If you can't do that, it becomes a domino effect on your life and health in a negative way. |

Year 2025 - Let Your Voice Be Heard!

Loring Hospital along with area providers have begun the process of updating a comprehensive community-wide 2025 Community Health Needs Assessment (CHNA) to identify unmet health needs. To gather current area feedback, a short online survey has been created to evaluate current community health needs and delivery. NOTE: Please consider your answers to the survey questions as it relates to ALL healthcare services in our community, including but not limited to our local hospital.

While your participation is voluntary and confidential, all community input is valued. Thank you for your immediate attention! CHNA 2025 online feedback deadline is set for February 3rd, 2025.

| 1. In your opinion community? | on, how would yo | ou rate the "Ove | erall Quality" of | healthcare de | livery in our |

e.) County Health Rankings & Roadmap Detail

[VVV Consultants LLC]

Sac County

2024

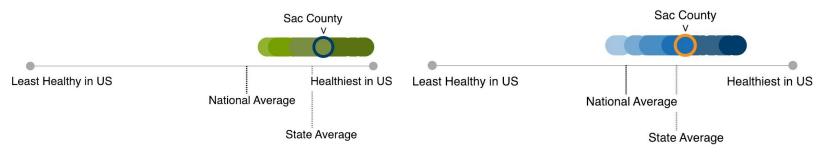

Health Outcomes and Health Factors summaries replace the numerical ranking provided in previous years. Each lowa county with sufficient data is represented by a dot, placed on a continuum from least healthy to healthiest in the nation. The color of each dot represents data-informed groupings of counties nationwide with similar Health Outcomes and Health Factors on the continuum.

https://www.countyhealthrankings.org/health-data/iowa/sac?year=2024

Health Outcomes

Health Factors

Population: 9,673

| HIV Prevalence | | | 114 | 382 | ~ |

Note: Blank values reflect unreliable or missing data.

The annual County Health Rankings & Roadmaps data release provides a snapshot of the health of each county in two summaries: Health Factors (which measure issues that can shape the health outcomes) and Health Outcomes (which measure length and quality of life). Each county is placed on a continuum from least healthy to healthiest in the nation and categorized into a group of counties with similar Health Outcomes or Health Factors. The following tables illustrate the "drivers" for health of this county.

What do these drivers mean? The drivers indicate the measures with the greatest impact on the health of the county. Drivers labeled with a green plus sign are measures on which the county performed particularly well compared to all counties nationwide. Those labeled with a red minus sign are measures which could be improved and may warrant additional attention.

Health Factors: Drivers with the greatest impact on health, Sac County, IA - 2024

| ealth Factors: Drivers with the greatest impact on health, | | | | |

HHSSYSTEMSNAPSHOT

SAC COUNTY

| Population | 9,686 |
|-----------------------|------------|
| Life Expectancy | 78.4 years |
| County Classification | Rural |
| STATE OF IOWA | |

| Population | 3,207,004 |
|-----------------|------------|
| Life Expectancy | 78.1 years |

ACCESS TO CARE

Sac County is a shortage area for Primary Care Physicians

Sac County is not a shortage area for Dental Care Providers

Access to care includes the ability to navigate the health care system, find care locally, and pay for services. When someone lacks one or more of these abilities, disparities may emerge.

MENTAL HEALTH

4.4

Poor mental health days per month

4.5 days/mo. lowa avg

Poor mental health is linked to smoking, physical inactivity, housing and food insecurity, and poor sleep. Disorders like depression and anxiety can affect people's ability to take part in healthy behaviors.

Sac County is a shortage area for Mental Health Care Providers

lowa has fewer mental health providers than the national average. Access to mental health providers varies widely across the state.

ADDICTIVE DISORDERS

25.4%

of adults report excessive drinking

23.3% Iowa avg Alcohol is the most commonly misused substance in lowa. lowa's alcohol use rates for almost every demographic are among the highest in the nation.

42

Sac County residents received substance use treatment in SFY24

16,994 total patients admitted in lowa

Substance use disorders involve misuse of one or more substances and may lead to social, physical, mental, and public health problems. Drug use rates in lowa are similar to the rest of the nation.

Social, Economic and Environmental Factors

ECONOMIC STABILITY & INCOME

Economic stability is the connection between the financial resources people have and their physical and mental health. People living in poverty are at greater risk for mental illness and chronic diseases.

8.7%Live below the rate of poverty

11.1% lowa avg

1,984
are enrolled in Medicaid

HOUSING & TRANSPORTATION

Cost-burden, spending more than 30% of income on housing costs, is the most common housing problem in lowa. Unstable, unsafe, unhealthy or unaffordable housing can harm a person's health, while transportation problems can delay care, be costly, and worsen health outcomes.

16.8%

Households spend 30% or more on housing

23.0% Iowa avg

4.2%

Households do not have a vehicle

5.6% lowa avg

Healthy Behaviors and Outcomes

ACTIVE LIVING & HEALTHY EATING

Being overweight or obese can lead to serious health issues like heart disease, diabetes, stroke, depression, and some cancers. A lack of consistent access to healthy food can lead to chronic diseases, obesity, or developmental problems.

41.1%

of adults have an unhealthy body weight (BMI of 30.0 or higher)

37.3% Iowa avg

940

Individuals experiencing food insecurity

CANCER

Many unhealthy behaviors linked to cancer can be prevented such as excessive drinking, using tobacco products, physical inactivity, poor nutrition, and ultraviolet light exposure. Cancer screening tests can detect cancer early, making treatment easier and improving survival.

479.9

County incidence rate for cancer (*per 100,000 people)

491.8 Iowa avg

140.5

County death rate from cancer (*per 100,000 people)

149.2 Iowa avg

| | CHNA Health Areas of Need | т | "Specific Actions" to Address Community Health Need or "Reasons Why Hospital Will Not" | Identified "Lead" | Identified Partners | Timeframe | (Hours) |
|---|---|---|---|--|--|-----------|---------|
| 1 | Mental Health (Diagnosis, Treatment, Placement, Aftercare with a focus on Greiatric, Parenting, and Digital Impact. | а | Explore adding Senior Life Solutions at Loring Hospital to provide structured, outpatient mental health support for seniors experiencing depression, anxiety, or emotional distress. Engage community partners for referrals, and consider telehealth options to improve accessibility and outreach in rural areas. | Loring Hospital & Iowa BH District #2 | 4H_FFA, Aux, HC_Extend, Clerg, Clin, Club, HD, MH, School, Senior, SS | | |
| | | b | Continue to organize and host public events such as Lunch & Learn presentations that feature local mental health advocates and address topics related to the subject of mental health. | | | | |
| | | С | Promote locally existing mental health services, facilities and providers. Educate community on placement process and options. Partner with Megan Dooley. | | | | |
| | | d | Continue to partner with community elementary, middle, and high schools to educate students on mental health (de-stigmatize mental health conditions, suicide prevention and social media bullying). Launch 988 initiatives (Public Health - all middle and high school). | | | | |
| | | е | Continue to build and expand Telehealth service offerings that are approved by area providers. Explore reimbursement options. Continue adding additional visiting specialists. | | | | |
| | | f | Continue to develop mental health referral relationships with key community partners for collective impact. Continue to explore potential office sites for additional mental health services, including primary care (satellite) clinics. | | | | |
| | | g | Engage a well known Guest Speaker to come to community to share on de-stigmatize mental health treatment. (Secure a speaker and continue it) (Kevin Himes) | | | | |
| | | h | Continue to educate all medical staff including EMS and Police officers regarding mental health delivery issues and how to address them. Provide continuing education courses to staff, lunch and learn presentations, etc. to keep them current in terms of treating mental health issues. | | | | |
| | | i | Continue Depression Screening initiatives at hospital and DOH. Provide intervention guidelines / handouts / adequate education | | | | |
| | | j | Explore the opportunity of sending Mental Health providers to local nursing homes. | | | | |
| 2 | Chronic Disease (Cancer & Heart) | а | Explore Medicare chronic disease program. Coordinate participation in the program and investing in resources (capital and Information systems) necessary to support the program | Loring Hospital & DOH | Aux, HC_Extend, Clin, Fit, School, Senior, SS, IA, Transp | | |
| | | b | Begin a chronic wellness campaign to encourage patients to look into / inform their healthcare providers of chronic disease family history. | | | | |
| | | С | Continue a Reminder Program to encourage residents to visit their providers regularly for preventative health / wellness annual check ups | | | | |

| | | d | Explore health education classes at schools, local areas, etc. (Lunch and Learns) with focus on hypertension, diabetes, smoking cessation, educate community on Health & Wellness practices, and chronic alcohol usage. | | | |
|---|---|---|---|---|--|--|
| | | е | Explore the usage of telemedicine to help with chronic disease management (more local). | | | |
| | | f | Continue to build follow-up protocols after screenings to raise awareness of the resources available in the community for those with chronic conditions with Unity Point Clinic, for PCP's. | | | |
| | | g | Continue to develop processes which support primary care and other providers in efforts to refer qualified patients to nutritionists and diabetic educators. Through the Care Coordinator. | | | |
| | | h | Continue to utilize the usage of chronic patient monitoring at home. Investigate Mobile APP support. | | | |
| | | i | Continue to promote community education on how to maintain health. Groups and/or Facebook page to get community involved. | | | |
| | | j | Utilize resources to address social determinant of health needs with "frequent flyers" to medical services. | | | |
| | | k | Explore grants and utilize grants already in place for Chronic Care through Preferred Family Care. | | | |
| 3 | Preventative Health/ Health Education | а | Create a formal Sac Co Community committee to educate residents regarding Healthcare 101 options and support services. | DOH & Loring Hospital | 4H_FFA, Aux, HC_Extend, Clerg, Clin, Club, Fit, HH_Hospice, Indu, School, Senior, SS, IA | |
| | | b | Partner with key community providers by having lunch-ins or monthly meetings for collective impact. Identify/contact key partners and gaps. "Continuum of Care Meetings" | | | |
| | | С | Create / provide health education materials focusing on health education to schools, libraries and 4-H FFA clubs. | | | |
| | | d | Launch "Walk With a Ease "outreach program to help enhance healthy behaviors in the community. Healthy Estate Walk. | | | |
| | | е | Explore a partnership with PSA Fitness & Wellness Centers to promote community wellness. Provide complimentary introductory classes to get people motivated and involved. | | | |
| | | f | Explore a back to school Carnival. Partner with Rec and Parks to promote these activities. Continue Health Fair activities with booths and relevant topics. | | | |
| | | g | Continue maintaining community Facebook page. Provide web links to area providers, schools, churches, and community programs. | | | |
| | | h | Continue community education events in order to promote local healthcare / self service programs and the importance of preventative care. | | | |
| 4 | Obesity (Nutrition & Exercise) | а | Launch a weight loss and management program led by Loring Hospital dietitian Jill to support healthy lifestyles and reduce chronic disease risk. Focus on personalized nutrition plans, group education sessions, and long-term behavior change strategies to promote sustainable outcomes. | Sac Community Rec Center & DOH | 4H_FFA, Aux, HC_Extend, Clin, Club, Fit, HH_Hospice, Hosp, Indu, School, Senior, SS | |

| 1 | l - | | | | | |
|---|---|---|--|--|--|--|
| | This health need is a community Social determinant, thus not part Hospital's Mission or Critical operations. Will partner with others as appropriate. | b | Continue to promote and expand access to Healthy Eating Active Lifestyle Program; an Intensive Behavioral Therapy for Obesity service. | | | |
| | | С | Continue to promote diabetes/nutrition services while also expanding access. Increase marketing at the Hospital. | | | |
| | | d | Explore partnership with Fitness Centers to publish an inventory of fitness centers hours of operation / fees (plus research fitness demand) in PSA. Promote "free" fitness events within the community - Zumba, water aerobics, family swim, local 5k's etc. Continue to promote/sponsor a community-wide "fitness challenge" i.e. Weight loss. | | | |
| | | е | Continue "Meals on Wheels" program to support healthy lifestyles for elderly, disabled, or confined to their homes. | | | |
| | | f | Continue / support Backpack school program. Increase access to healthy foods in schools for youth with "No Kid Hungry" Campaign. Continue to promote WIC and food stamp programs. Utilize clergy and other resources to increase access to healthy foods. | | | |
| | | g | Develop "Awareness Program" to educate elementary/middle school children and their families about healthy lifestyles. Healthy snack program through extension office. | | | |
| | | h | Continue expansion for Parks & Rec to get full utilization of this new available resource. Spread awareness of this new service coming and/or create a social media page for updates, events, or classes the community can engage in. | | | |
| | | i | Continue to create and maintain community gardens including food pantries. Continue to develop walking/ biking trails in PSA. | | | |
| | | j | Continue to have access to healthy foods in schools. Ask School Districts to present what they have done so far with improving the school lunches. | | | |
| | | k | Continue to promote / provide "low cost" sports physicals / wellness examinations with school parents. | | | |
| | | I | Create a formal Hospital Marketing Plan to promote existing healthcare services, facilities and specialists. Con't Community Health Education Activities, use both traditional & social media tools and develop website virtual tours. | | | |
| | | m | Explore grants for free education regarding nutrition / physical activity / owning your health. | | | |
| | | n | Explore a public health campaign using social media, local radio, and community events to raise awareness about the importance of healthy eating and regular exercise in preventing obesity. Share local success stories of individuals or families who have adopted healthier lifestyles. Shelley Public Health. | | | |
| 5 | Food Insecurity | а | Launch a program with the school to donate unused but safe food to the community refrigerator or local food pantry, reducing waste and addressing food insecurity. Coordinate logistics, ensure proper | New Opportunities (Food Bank) & DOH | 4H_FFA, Aux, Chamb, Clerg, Club, Co, Ec Dev, Hosp, Indu, School, Senior, SS | |
